Subject: Please Shut Down Indian Point

Dear Sir or Madame,

It's past the time necessary for shutting down the plant, but that is not a good enough reason not to shut it down. It poses a health risk when it is operating properly, so I don't want to contemplate what it would mean for my children and my neighbor's children if something should go wrong.

Plus, where is all the nuclear waste, currently stored on site, going to wind up? That is a nasty business in and of itself. They can ship it to Nevada, but I consider Nevada my neighbor as well.

It's time to put our efforts into a sustainable source of energy, without the myriad of problems associated with nuclear.

Thanks for receiving my

input. Regards,

Kurt Helstrom
