Subject: Close Indian Point

It is time to close this plant, and begin protecting the human life and all living organisms for that matter that are at risk and suffering at the mercury of this old, corroded and terribly dated facility. Plus, there have been studies that prove the evacuation procedures won't work.

Time to focus on other means, natural recourses to generate energy. Indian Point must go before it's too late.

I live walking distance from the plant. I love my home and family but worry every day.

Sincerely,

Lorelei Edwards
