Haimanot,

Please see the email below. It is from Augustana and addresses the questions/comments raised by you and Polly regarding the evaluative report recently completed by Augustana. The revised map will be forwarded as soon as the update is completed. The contents of the attachment are considered confidential and not for public access.

Richard

Richard,

I believe Austin has or will soon send the shape files to update the base map as per Polly's questions 1, 2, and 4. The answer to question 3 is that the architectural historian says she evaluated the log barn structure using Criterion A.

On the phone Polly also requested a list of the ten cairn sites in the project area and the corresponding page number in the survey report. That list is attached.

Linda
