Dear Ms. Hammond,

In response to your letter of 9/20/2012 we acknowledge that our license will be amended to allow 35.100 for oral administration of Iodine-131. We would like to have a maximum possession limit of 100 mCi taking into consideration of a,b,and c listed below. We realize this will be listed as a line item leaving the other in case an authorized user comes to our facility with the necessary qualifications. Thank you. Karen Beemer, CNMT

License No.: 49-18230-01
Docket No.: 030-14695
Control No.: 577835

Dear Ms. Beemer:

This is in reference to your Nuclear Regulatory Commission License No. 49-18230-01. During our review for your license amendment to release for unrestricted use the "old" nuclear medicine department, we noticed that you are authorized for 35.300 on section 6.C. of your license.

The only authorized user on your license is Dr. Gregory Cross who is authorized for 35.100, 200, and oral administration of Iodine-131 less than 33 millicuries. In an effort to clarify the possession and authorization for your license, we will keep the authorization for 35.300 on your license but FOR STORAGE ONLY. We will list the authorization for the I-131, but to do this we are requesting the following information:

- 1) Please provide a maximum possession limit for the I-131 less than 33 millicuries (for oral administration), that you would like on the license.
PLEASE take into consideration:
 - a) your inventory on hand
 - b) your patient load
 - c) waste

We will continue our review upon receipt of this information. Please reply to my attention at the Region IV Office and refer to Mail Control No. 577835. Please respond to this e-mail by **October 1, 2012**. You may reply via e-mail as long as the response is attached in a PDF format or by fax to 817-200-1188.

Please don't hesitate to contact me or Michelle Simmons (michelle.simmons@nrc.gov) if you have any questions.

Thank You.

Best Regards,

Michelle M. Hammond, M.Sc.
