Mr. Georgetti,

This is your confirmation that we have received from United International Corporation the following devices:

One Seaman Nuclear model C-200 portable density/moisture gauge serial number L-654, containing 4.5 mCi Radium226Beryllium in a sealed source capsule.
One Seaman Nuclear model C-300 portable density/moisture gauge serial number 21018, containing 4.5 mCi Radium226Beryllium in a sealed source capsule.
These devices were received and have been transferred to Seaman Nuclear Corporation on September 6, 2012.

Sincerely,

Harry Seaman, Vice President
Seaman Nuclear Corporation

Hi,

UIC had sent 2 gauges for disposal on Aug 30th. I had given my email address over the phone and was waiting for some paperwork showing that they were received.

I have not received anything yet.

They were gauges with serial numbers as follows:

<!--[if !supportLists]-->• <!--[endif]-->L654
<!--[if !supportLists]-->• <!--[endif]-->210018

Please forward by email. Thanks.

Sincerely,

Peter Georgetti, P.E.
