Description of project activities:

This was a time critical project. Investigated the crash remains and debris of MH-53 helicopter. Performed radiological surveys of items and areas for the presence of fixed and loose surface contamination. No contaminated items or areas were found during the investigation above the release limits.

Waste Management and disposition:

Waste materials (7 IBIS's and ice detector source) were packaged into DOT approved containers and transported to Camp Carroll in South Korea for temporary storage for pickup and disposal at a later date.

Final Survey Results Summary:

N/A

Complications/Unexpected encounters with radioactive materials:

N/A
