NMSS/RGN1 MATERIALS-002

Item Number 5: Radioactive Materials:

Any byproduct material permitted by 10 CFR 35:200

We do not intend to use or possess any sealed sources that do not meet the criteria in 10 CFR 35.65 (e.g. .greater than 30 millicuries)

Item Number 6: Purpose(s) for which licensed materials will be used:

Use of unsealed byproduct material for imaging and localization studies for which a written directive is not required by 10 CFR 35.200

Item Number 7: Individuals Responsible for Radiation Safety Program and Their Training and Experience:

The Radiation Safety Officer at Alfieri Cardiology, P.A. is Paul J. Alfieri, M.D. He is currently listed on our license as the RSO

The Authorized Users at our facility are as follows: Paul J. Alfieri, M.D. is currently authorized for use of material listed under 35.100; 35.200

Item Number 8: Training for Individuals Working in or Frequenting Restricted Areas

Alfieri Cardiology, P. A. Has established and implemented a training program consistent with NUREG 1556, Vol. 9, Revision 2, Appendix J for "Individuals Involved in the Medical Usage of Byproduct material" at the following intervals:

- Nuclear Medicine Technologist Upon starting work with radioactive materials, annually thereafter or when there is a change in regulations or license conditions.
- Ancillary Personnel Initially and when deemed necessary by the RSO.

The following will be documented:

- Date and duration of training
- Name of individual providing the training
- Name of individuals trained

Item Number 9: Facilities and Equipment

General

Alfieri Cardiology, P.A. operates at its current address site. Images of the diagram of the facility can be found in Attachment B.

Locations of Use

Radioactive material will be delivered to and stored in the Hot Lab. Radioactive material will be injected in either the treadmill room or the injection room and the patient will be imaged in the camera room.

Structural Shielding

Walls are constructed of 5/8" gypsum wall board on a wood frame. The building exterior is brick. The building is a single story, with no occupancy above or below the hot lab, injection room or camera room.

Additional Shielding

Radiopharmaceuticals and sealed sources will be stored in the manufacturers shielding until being used. Additional shielding will be available to maintain doses to occupationally exposed individuals and individual members of the public as low as reasonably (ALARA) achievable, specifically, the following shielding is available:

- Mfg Unit Dose shield
- Mfg Source shields
- Manufacture vial shield
- Syringe shields
- Rad waste Storage: 2" lead bricks around sharps container & lead lined waste container.
- L-Block

Item Number 10: Radiation Safety Program

1. Audits of the program

We have developed and will implement and maintain written procedures in accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix L Model Licensee Audit"

2. Dosimetry:

We have developed and will implement and maintain written procedures in accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix M Model Procedures for an Occupational Dose Program"

3. Radiation Detection

Below is a list of instruments available to make required measurements and perform required surveys...

Meter/Analyzer (Make & Model)	Probe/Detector (Make & Model)	NO. OF UNITS	RADIATION DETECTED (α, β, γ)	SENSITIVITY RANGE (mR/hr, cpm)
Ludlum 14C or equivalent	44-7	1	β, γ	0.01- 200 mR/hr
Ludlum 2200 Well Counter	NaI	1	γ	0 – 999,999 cpm
			β, γ	

Note: We reserve the right to upgrade our survey instruments as necessary as long as they are adequate to measure the type and level of radiation for which they are used.

Radiation monitoring instruments will be calibrated by a person qualified to perform survey meter calibrations.

Dose Calibrator and Other Equipment Used to Measure Dosages of Unsealed Byproduct Material

A Capintec CRC -7 Dose Calibrator or equivalent will be used to measure patient dosages prior to administration and will be calibrated in accordance with nationally recognized standards or the manufacturer's instruction.

4. Material Receipt and Accountability

We have developed and will implement and maintain written procedures for area surveys in

Accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix O Model Procedures for Ordering and Receiving Packages"

We have developed and will implement and maintain written procedures in Accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix P Model Procedures for Safely Opening Packages Containing Radioactive Material."

5. Occupational Dose Projections and Control Mechanisms

Either we will perform a prospective evaluation demonstrating that unmonitored individuals are not likely to receive, in one year, a radiation dose in excess of 10% of the allowable limits in 10 CFR Part 20 or we will provide dosimetry that meets the requirements listed under "Criteria" in Appendix M, NUREG-1556, Vol. 9, Rev. 2.

6. Public Dose Projections and Control Mechanisms

Surveys performed in unrestricted areas indicate that it is unlikely that any individual member of the public will exceed regulatory limits from external sources. No volatile material is used on site; therefore, dose as a result of inhalation is remote.

7. Safe Use of Radionuclides and Emergency Procedures. Include the ALARA Program and all Applicable Procedures.

We have developed and will implement and maintain written procedures in Accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix N Model Emergency Procedures."

We have developed and will implement and maintain written procedures in Accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix N Model Procedures for Developing, Maintaining, and Implementing Written Directives"

We have developed and will implement and maintain written procedures in Accordance with "NUREG 1556 vol. 9 rev. 2 Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses. Appendix T Model Procedures for Safe Use of Unsealed Licensed Material"

We have developed and will implement and maintain written procedures for safe response to spills of licensed material in accordance with 10 CFR 20.110.

We have developed and will implement and maintain procedures for safe use of unsealed Byproduct material that meet the requirements of 10 CFR 20.1101 and 10 CFR 20.1301.

8. Surveys and Their Frequency

We have developed and will implement and maintain written procedures for area surveys in accordance with 10 CFR 20.1101 that meet the requirements of 10 CFR 20.1501 and 10 CFR 35.70. Radiation and contamination limits from Appendix R of NUREG 1556 Vol 9, Rev 2 will be used on survey forms.

Semi-annual sealed source inventory and leak testing will be performed consistent with procedures in Appendix Q of NUREG 1556, Vol. 9. Rev. 2.

9. Transportation

Radioactive material shall be transported in accordance with the provisions of 10 CFR Part 71. Manufacturer's procedures for return of radiopharmaceuticals and sealed sources will be adhered to. Item Number 11: Waste Management

We have developed and will implement and maintain written waste disposal procedures For licensed material, in accordance with 10 CFR 20.1101, that also meets the requirements of the applicable section of Subpart K to 10 CFR Part 20 and of 10 CFR 35.92.

This is to acknowledge the receipt of your letter application stated
$\frac{1}{12013}$, and to inform you that the initial processing which includes an administrative review has been performed. REDCW (07-28/54-01) There were no administrative omissions. Your application was assigned to a technical reviewer. Please note that the technical review may identify additional omissions or require additional information.
Please provide to this office within 30 days of your receipt of this card

A copy of your action has been forwarded to our License Fee & Accounts Receivable Branch, who will contact you separately if there is a fee issue involved.

Your action has been assigned **Mail Control Number** 57465. When calling to inquire about this action, please refer to this control number. You may call us on (610) 337-5398, or 337-5260.
