

## CHAPTER 19—PRA AND SEVERE ACCIDENT

### TABLE OF CONTENTS

19.0 PROBABILISTIC RISK ASSESSMENT AND SEVERE ACCIDENT EVALUATION .....	19.0-1
19.0.1 NRC Regulatory Requirements and Related Policies .....	19.0-1
19.0.2 Uses of PRA and Severe Accident Evaluations .....	19.0-2
19.0.3 Structure of Chapter 19 .....	19.0-3
19.0.4 References .....	19.0-4
19.1 Probabilistic Risk Assessment .....	19.1-1
19.1.1 Uses and Applications of the PRA .....	19.1-1
19.1.1.1 Design Phase .....	19.1-1
19.1.1.2 Combined License Application Phase.....	19.1-2
19.1.1.3 Construction Phase .....	19.1-2
19.1.1.4 Operational Phase.....	19.1-2
19.1.2 Quality of PRA.....	19.1-2
19.1.2.1 PRA Scope.....	19.1-3
19.1.2.2 PRA Level of Detail .....	19.1-4
19.1.2.3 PRA Technical Adequacy.....	19.1-5
19.1.2.4 PRA Maintenance and Upgrade.....	19.1-7
19.1.3 Special Design/Operational Features.....	19.1-10
19.1.3.1 Design/Operational Features for Preventing Core Damage .....	19.1-10
19.1.3.2 Design/Operational Features for Mitigating the Consequences of Core Damage and Preventing Releases from Containment.....	19.1-12
19.1.3.3 Design/Operational Features for Mitigating the Consequences of Releases from Containment....	19.1-13
19.1.3.4 Uses of the PRA in the Design Process.....	19.1-13
19.1.4 Safety Insights from the Internal Events PRA for Operations at Power.....	19.1-15
19.1.4.1 Level 1 Internal Events PRA for Operations at Power .....	19.1-15

---

19.1.4.2	Level 2 Internal Events PRA for Operations at Power .....	19.1-64
19.1.5	Safety Insights from the External Events PRA for Operations at Power.....	19.1-114
19.1.5.1	Seismic Risk Evaluation .....	19.1-114
19.1.5.2	Internal Flooding Risk Evaluation.....	19.1-139
19.1.5.3	Internal Fires Risk Evaluation.....	19.1-157
19.1.5.4	Other Externals Risk Evaluation.....	19.1-178
19.1.6	Safety Insights from the PRA for Other Modes of Operation.....	19.1-181
19.1.6.1	Description of the Low-Power and Shutdown Operations PRA .....	19.1-181
19.1.6.2	Results from the Low-Power and Shutdown Operations PRA. ....	19.1-190
19.1.6.3	Description of Level 2 PRA for Low-Power and Shutdown Operations.....	19.1-197
19.1.6.4	Results of the Low Power and Shutdown Level 2 Evaluation.....	19.1-209
19.1.7	PRA-Related Input to Other Programs and Processes .....	19.1-217
19.1.7.1	PRA Input to Design Programs and Processes ..	19.1-217
19.1.7.2	PRA Input to the Maintenance Rule Implementation.....	19.1-217
19.1.7.3	PRA Input to the Reactor Oversight Process .....	19.1-217
19.1.7.4	PRA Input to the Reliability Assurance Program.....	19.1-217
19.1.7.5	PRA Input to the Regulatory Treatment of Non-Safety-Related Systems Program .....	19.1-218
19.1.8	Conclusions and Findings .....	19.1-218
19.1.8.1	Risk Metrics:.....	19.1-218
19.1.8.2	Risk Distribution: .....	19.1-219
19.1.8.3	Importance Ranking: .....	19.1-220
19.1.8.4	Sensitivity and Uncertainty: .....	19.1-220
19.1.9	References .....	19.1-221
19.2	Severe Accident Evaluations.....	19.2-1
19.2.1	Introduction.....	19.2-1
19.2.2	Severe Accident Prevention .....	19.2-1

---

19.2.2.1	Anticipated Transient Without Scram .....	19.2-1
19.2.2.2	Mid-Loop Operations.....	19.2-2
19.2.2.3	Station Blackout .....	19.2-2
19.2.2.4	Fire Protection .....	19.2-3
19.2.2.5	Intersystem Loss of Coolant Accident.....	19.2-3
19.2.2.6	Other Severe Accident Preventative Features .....	19.2-4
19.2.3	Severe Accident Mitigation.....	19.2-5
19.2.3.1	Overview of Containment Design.....	19.2-5
19.2.3.2	Severe Accident Progression .....	19.2-6
19.2.3.3	Severe Accident Mitigation Features.....	19.2-9
19.2.4	Containment Performance Capability.....	19.2-24
19.2.4.1	Introduction.....	19.2-24
19.2.4.2	Analytical Methodology .....	19.2-25
19.2.4.3	Assumptions.....	19.2-30
19.2.4.4	Severe Accident Evaluations.....	19.2-30
19.2.4.5	Conditional Containment Failure Probability .....	19.2-55
19.2.4.6	Summary .....	19.2-56
19.2.5	Accident Management.....	19.2-56
19.2.5.1	Accident Management through Design .....	19.2-58
19.2.5.2	OSSA Directed Actions .....	19.2-58
19.2.5.3	Interface with Emergency Procedures .....	19.2-58
19.2.5.4	Measurable Safety Objectives.....	19.2-59
19.2.5.5	RPV Integrity Management .....	19.2-59
19.2.5.6	Post-RPV Failure - Short-Term Response .....	19.2-60
19.2.5.7	Post RPV Failure - Long-Term Response.....	19.2-60
19.2.6	Consideration of Potential Design Improvements under 10 CFR 50.34(f).....	19.2-60
19.2.6.1	Introduction.....	19.2-60
19.2.6.2	Estimate of Risk for Design .....	19.2-61
19.2.6.3	Identification of Potential Design Improvements ...	19.2-61
19.2.6.4	Risk Reduction Potential of Design Improvements.....	19.2-63
19.2.6.5	Cost Impacts of Candidate Design Improvements.....	19.2-64

---

19.2.6.6	Cost-Benefit Comparison .....	19.2-64
19.2.6.7	Conclusions.....	19.2-64
19.2.7	Beyond Design Basis Large Commercial Aircraft Impact Assessment .....	19.2-64
19.2.7.1	Introduction.....	19.2-64
19.2.7.2	Assessment Scope.....	19.2-64
19.2.7.3	Methodology.....	19.2-65
19.2.7.4	Design Features Credited for Conformance with 10 CFR 50.150.....	19.2-65
19.2.7.5	Evaluation of U.S. EPR Performance.....	19.2-69
19.2.7.6	Conclusions.....	19.2-71
19.2.8	Beyond Design Basis Extended Loss of AC Power Assessment.....	19.2-72
19.2.9	References .....	19.2-72
19.3	Open, Confirmatory, and COL Action Items Identified as Unresolved .....	19.3-1
19.3.1	Resolution of Open Items .....	19.3-1
19.3.2	Resolution of Confirmatory Items .....	19.3-1
19.3.3	Resolution of COL Action Items .....	19.3-1
19A	Event Trees for Core Damage Sequences Initiated During Power Operation .....	19A-1
19B	Event Trees for Core Damage Sequences Initiated During Low Power Operation.....	19B-1
19C	Containment Event Trees (CET) for Containment Performance Sequences Initiated During Power Operation .....	19C-1
