OPERATOR RETAKE INITIAL EXAMINATION 05000259/2013302,  
05000260/2013302, AND 05000296/2013302**

Dear Mr. Shea:

In a telephone conversation on August 7, 2013, between Mr. Chris Vaughn, Ops Training Manager, Mr. Dan Zielinski, Facility Representative, Mr. Mike Gibson, Exam Author, and Mr. Phillip Capehart, Senior Operations Engineer, arrangements were made for the administration of retake licensing examinations at Browns Ferry Nuclear Plant. The on-site preparatory week and the administration of the administrative topics portion and control room/in-plant systems portion of the operating test is scheduled for the week of September 23, 2013.

As agreed during the telephone conversation, your staff will prepare the administrative topics portion and control room/in-plant systems portion of the operating test based on the guidelines in Revision 9, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The U.S. Nuclear Regulatory Commission (NRC) regional office will discuss with your staff any changes that might be necessary before the examinations are administered. Your staff has also agreed to make copies of all examination materials that are necessary for administering the examination.

To meet the above schedule, it will be necessary for your staff to furnish the operating test outlines, operating tests, and the supporting reference materials identified in Attachment 3 to ES-201 by August 26, 2013. Pursuant to Title 10, Section 55.40(b)(3), of the Code of Federal Regulations (10 CFR 55.40(b)(3)), an authorized representative of the facility licensee shall approve the outline and operating test before they are submitted to the NRC for review and approval. All materials shall be complete and ready-to-use.

We request that any personal, proprietary, sensitive unclassified, or safeguards information in your response be contained in a separate enclosure and appropriately marked. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above.

Appendix E, of NUREG-1021, contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications, medical certifications, and waiver requests (if any) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.
