Docket No. 15000042

TX License No. L05021

Lloyd Anderson
Corporate Radiation Safety Officer
Hi-Tech Testing Services, Inc.
P.O Box 12568
Longview, TX 75607

SUBJECT: NRC INSPECTION REPORT NO. 15000042/2013002 & 2013003, HI-TECH TESTING SERVICES, INC.

Dear Mr. Anderson:

This letter forwards NRC Form 591, "Safety Inspection," indicating that no items of non-compliance were found during the above described inspection of your licensed activities. Please retain the form in your files. No acknowledgment of this letter is required. However, should you have any questions, we shall be pleased to discuss them with you.

The inspection was performed under reciprocity at a construction site located in Triadelphia, West Virginia. During the inspection, the radiography crew was interviewed to discuss their work practices while at temporary job sites. The radiographers indicated that Texas rules allow work to be performed by a single trained individual as long as a second trained individual was available in the area (i.e., inside the vehicle developing film). Although not directly observed by the inspector, we note that such practice does not meet the NRC requirements of 10 CFR 34.41(a), regarding conduct of field radiography operations by two qualified individuals, and would not be acceptable at temporary job sites in NRC jurisdiction.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Regulations, Guidance and Communications**. The current Enforcement Policy is included on the NRC's website at www.nrc.gov; select **About NRC, Organizations & Functions; Office of Enforcement; Enforcement documents**; then **Enforcement Policy (Under 'Related Information')**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

L. Anderson
