General Comment

I feel bad when I think about all the risks for our health and all life on earth beause of the nuke plants and their long lived and toxic waste.

The waste is not safe in the spent fuel pools nor far below in the ground in big amounts.

I think it's better to stop all the nukes on earth as son as possible and store the waste in several places, in small amounts and not too far deep in the ground.

Mox should be forbiden immediatelly !

I live in France and has learned plenty on ENENEWS.
