ROCK CORE LOG

PROJECT: Progress Energy Florida - COLA Investigation, Levy County Site LOCATION: 1723362.2 N, 457763.1 E (NAD83)

START: 6/14/2007

DESCRIPTION

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

73.2, 73.5, 74.0' - Fractures (3), rough,

undulating, between two horizontal fractures

75.0-76.1' - multiple Fractures to fragments,

many vertical fractures with 3-4" fragments,

banded at top by 40 deg rough, undulating

undulating fracture
76.9-77.0' - Fractures or mechanical break

77.15' - Fracture, smooth, planar, horizontal

78.4' - Fracture, 20 deg, rough, undulating, at

80.6' - Fracture, 20 deg, rough, some crumble, open, gray infill at cavity included in

Fractures (7), open to tight, mostly horizontal

83.9-84.5' - softer, bounded by fractures, infill

85.3' - Fracture, 45 deg, rough, undulating,

87.1' - Fracture, open, horizontal fracture to

87.5' - Fracture, 45 deg, roughly stepped, also a discontinuity, overlying and underlying rock are different, though fracture mostly in

87.8' - Fracture, open, horizontal, roughly

different material with additional voids and

89.9, 90.0' - Mechanical break (2), 0-20 deg

90.9' - Fracture, 50 deg, rough, undulating, at

stepped, several small 1/2" fragments 88.6' - similar to fracture at 87.8', but in

small fragments with two 1" fragments

healed or mechanical break

82.1, 82.8, 83.3, 83.9, 84.3, 86.1, 86.6' -

fractures, substantial voids, gray infill at

fracture, possible drilling mud, possibly

zone of increased voids and cavities from

74.4' - Fracture, 75 deg, rough, undulating

73.3' - Fractures (2), 50 deg, rough,

fracture, at bottom by 20 deg rough

DISCONTINUITIES

ELEVATION: 43.1 ft (NAVD88) DRILLING CONTRACTOR: Universal Engineering Sciences, Ft. Myers, FL; Driller: R. Woodard

CORING METHOD AND EQUIPMENT : CME 75 S/N 252437, mud rotary, HQ tools, HW casing

undulating, horizontal

ORIENTATION: Vertical LOGGER: J. Schaeffer, D. Thomas LITHOLOGY COMMENTS ROCK TYPE, COLOR, SIZE AND DEPTH OF CASING, FLUID LOSS, CORING RATE AND SMOOTHNESS, CAVING ROD MINERALOGY, TEXTURE, WEATHERING, HARDNESS, AND ROCK MASS DROPS, TEST RESULTS, ETC. CHARACTERISTICS Poorly Graded Sand With Silt (SP-SM) 72.0-72.7' - yellowish gray, (5Y 7/2), wet, mild HCl reaction, 85% fine grained subangular silica sand, 5% coarse silica sand, 10% silt-sized carbonate material Organic Soil (OL) Box break at 74.5', just 72.7-72.8' - olive black, (5Y 2/1), below or at near-vertical medium stiff, medium plasticity, mild fracture HCI reaction Limestone R1:6 minutes 72.8-77.0' - light olive gray to moderate olive brown, (5Y 5/2 to 5Y 4/4), fine grained, extremely weak (R)0 from 72.8-74.2', weak to medium strong elsewhere (R2 to R3) 77.0-81.2' - light olive gray, (5Y 5/2), fine grained, mild to moderate HCI Driller's Remark: Drilling reaction, weak (R2), with trace soft intermittently at about darker gray banding variably throughout, several 1/2"-1" cavities. voids (1/16 to 1/8") varying 5-20% coverage, increased voids and cavities near 77.7, 78.4, 80.4, 80.7, 81.2', subtle organic band at 81.25' with slight darker color shift and less voids below (20% above, 5% below), R2:5 minutes gray cavity infill at 80.4' with strong HCÍ reaction No Recovery 81.2-82.0' Limestone 82.0-86.8' - Same as 77.0-81.2' except weak to medium strong (R2 to R3), increased voids to 25% and numerous cavities and dissolutions up to 2" with gray infill at 82.0-83.3 and 85.8-86.8, very weak (R1) at 83.9-84.5', some cavities reach almost across the core R3:4 minutes No Recovery 86.8-87.0' Limestone 87.0-87.3' - moderate yellowish brown, (10YR 5/4), fine grained, mild to moderate HCl reaction, weak (R2), 40% small (1/16") voids, several cavities up to 1/2" (fossils), friable 87.3-88.25' - pale yellowish brown, (10YR 6/2), fine grained, mild to moderate HCI reaction, weak (R2), <3% voids, several fossil cavities up to 1/2", less friable than above R4:5 minutes

DESCRIPTION

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

76.95, 79.85, 80.55' - Fracture (3), 25 deg and 45 deg, rough, planar to undulating, tight

77.4' - Fracture, 30 deg, rough, undulating,

77.75' - Fracture, horizontal, rough, planar,

78.3' - Fracture, horizontal, rough, planar to

81.9' - Fracture, horizontal, rough, planar

with a 1" fragment wedge between 2

82.35' - Fracture (2), 30 deg, rough, planar,

83.95' - Fracture, 50 deg, rough, stepped,

84.85' - Fracture, 60 deg, rough, undulating,

85.0-85.15' - Fracture zone, small 1/4 and

85.15, 85.4, 85.75' - Fracture (3), 10 deg,

85.5' - Fracture, 80 deg, rough, undulating to stepped, from 85.15 to 85.75

85.85' - Fracture, 70 deg, rough, undulating, from 85.75 to 86.0 continuation of overlying

86.2' - Fracture, 75 deg, rough, undulating,

fragmentation and debris, nearly fracture

87.0, 87.2' - Fracture (2), 10 deg, rough,

87.65' - Fracture, 10 deg and 30 deg, rough,

very open fracture with significant

88.45' - Fracture, horizontal, rough,

very open with fragmentation

89.5-89.8' - Fracture zone

undulating to stepped, tight to healed

88.75' - Fracture, 75 deg, rough, stepped, tight, bounded by fractures at 88.15 and

89.15' - Fracture, 20 deg, rough, stepped,

planar, open, rounded

undulating, open

89 15'

86.55' - Fractures, horizontal, rough, stepped,

84.55' - Fracture, 10 deg, rough, planar

leading to fracture zone at 85.0'

rough, undulating to stepped
