To Whom It May Concern:

We are currently looking into purchasing additional density gauges for our company. The license number is 47-35081-01 that we want to amend. We would like to adjust the amount of Cesium 137 that we are licensed to possess from 18 millicuries to 72 millicuries and the amount of Americium 241 from 88 millicuries to 352 millicuries. This will accommodate for the additional gauges that we plan to purchase. The gauges will be the same Troxler Model 3440 portable density gauges that is currently listed on our license. Thank you for your time in making this adjustment.
