Selected Social Characteristics in the United States: 2005-2009

2005-2009 American Community Survey 5-Year Estimates

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Geography: Florida

Selected Social Characteristics in the United States	Number		Percent	
	Estimate	Margin of Error	Estimate	Margin of Error
HOUSEHOLDS BY TYPE				
Total households	7,076,539	+/-19,863	7,076,539	(X)
Family households (families)	4,610,588	+/-19,432	65.2%	+/-0.1
With own children under 18 years	1,905,642	+/-14,046	26.9%	+/-0.1
Married-couple family	3,416,823	+/-20,100	48.3%	+/-0.2
With own children under 18 years	1,256,601	+/-13,963	17.8%	+/-0.2
Male householder, no wife present, family	320,325	+/-4,680	4.5%	+/-0.1
With own children under 18 years	148,324	+/-3,158	2.1%	+/-0.1
Female householder, no husband present, family	873,440	+/-6,824	12.3%	+/-0.1
With own children under 18 years	500,717	+/-5,243	7.1%	+/-0.1
Nonfamily households	2,465,951	+/-9,422	34.8%	+/-0.1
Householder living alone	1,984,138	+/-8,810	28.0%	+/-0.1
65 years and over	776,752	+/-7,483	11.0%	+/-0.1
Households with one or more people under 18 years	2,132,316	+/-14,803	30.1%	+/-0.1
Households with one or more people 65 years and over	2,105,303	+/-7,560	29.8%	+/-0.1
Average household size	2.52	+/-0.01	(X)	(X)
Average family size	3.09	+/-0.01	(X)	(X)
RELATIONSHIP				
Population in households	17,799,921	*****	17,799,921	(X)
Householder	7,076,539	+/-19,863	39.8%	+/-0.1
Spouse	3,414,850	+/-19,227	19.2%	+/-0.1
Child	4,934,960	+/-13,376	27.7%	+/-0.1
Other relatives	1,293,610	+/-19,882	7.3%	+/-0.1

Source: U.S. Census Bureau, 2005-2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

Â-Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Â-The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Because of contextual differences between the 2008-2009 disability data and disability data collected in prior years, the Census Bureau is unable to combine the 5 years of disability data in order to produce the multi-year estimate that would appear in this table. Multi-year estimates of disability status will become available once five consecutive years of data are collected. For more information about the differences between the 2008 and prior years' disability questions, see Review of Changes to the Measurement of Disability in the 2008 ACS.

Â-Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Â-While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Â-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
