Jamie L. Headley, Radiation Safety Officer
U.S. Environmental Protection Agency
National Enforcement Investigations Center
P.O. Box 25227, Building 25
Denver Federal Center
Denver, CO 80225-0227

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 05-14892-01

By letter dated August 11, 2014, U.S. Environmental Protection Agency National Enforcement Investigations Center informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated August 11, 2014, stated that all radioactive material used as calibration standards had been disposed using a waste contractor.

The supporting documentation to the NRC Form 314 also provided a copy of the final radiation survey. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility and the facility located at Building 25, Denver Federal Center, Denver, CO, 80225-0227, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment Number 25 to License Number 05-14892-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1596 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Lizette Roldán-Otero, Ph.D., Health Physicist
Nuclear Materials Safety Branch B
