---

Kathleen,

It was nice to finally meet you face to face at the OAS meeting last month. I mentioned to you that I thought there was a mistake on the SRS data sheet you brought for us. 2003-1 was one that we wrote a letter saying we thought our regulations were already compatible. We received a letter back from the NRC that we were. On the SRS data sheet it says that they are proposed but not final. I really thought we took care of that before IMPEP in 2012. Do we need to send something else to clear this up?
