

**U.S. Nuclear Regulatory Commission Monthly Status Report
Activities Related to the Yucca Mountain Licensing Action
Report for October 2014**

Background

On August 13, 2013, a panel of the U.S. Court of Appeals for the District of Columbia Circuit issued its decision in the case *In re Aiken County* directing the U.S. Nuclear Regulatory Commission (NRC) to “promptly continue with the legally mandated licensing process” for the U.S. Department of Energy’s (DOE’s) application to construct a geologic repository for high-level waste at Yucca Mountain, NV. The NRC promptly began taking steps to comply with the court’s direction following the issuance of the decision. On November 18, 2013, the Commission approved a memorandum and order, which set a course of action for the Yucca Mountain licensing process that is consistent with the Appeals Court decision and with the resources available. The Commission also issued a related staff requirements memorandum (SRM) on November 18, 2013. The Commission provides further direction to the staff as needed.

Accomplishments and Ongoing Work

The NRC staff in the Office of Nuclear Material Safety and Safeguards, with the support of the Center for Nuclear Waste Regulatory Analyses, continues to make progress toward completing the safety evaluation report (SER). Attached is the task tracking tool, “Status of Safety Evaluation Report (SER) Chapters and Volume Tasks,” which documents work completed through October 31, 2014. On October 16, 2014, the NRC staff published SER Volume 3, which is available on the NRC’s website, <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1949/>. The NRC also distributed the document to the participants in the adjudicatory proceeding and other interested stakeholders. The NRC staff has completed the majority of the milestones for the chapters in Volumes 2, 4 and 5; management provides additional oversight and support for those chapters not meeting the projected schedule. Management and staff are actively working to resolve delays in those chapters to ensure completion of the SER by January 2015. Completion of the SER remains the staff’s highest priority for this project.

Agency attorneys provided support to the staff and the Commission on project activities, advised the staff on issues related to SER development, and continued reviewing draft chapters of the SER.

Schedule and Cost for Remaining Activities

Completion of the SER is scheduled to take approximately 12 months, ending in January 2015. To date, no unforeseen technical or process issues have arisen that would affect the completion date. SER activities are proceeding within the September 2013 budget estimate of \$8.3 million.

Enclosure

The schedule for completion of an environmental impact statement (EIS) supplement is being considered. On February 28, 2014, DOE informed the NRC that it would not complete an EIS supplement that the staff has determined is needed for the review of DOE's application under the National Environmental Policy Act, but rather would provide an update to a 2009 technical report that would inform an EIS supplement. On April 7, 2014, NRC staff met with DOE staff in a public meeting to discuss DOE's revision of this report, titled, "Analysis of Postclosure Groundwater Impacts for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada." On October 3, 2014, the DOE submitted its 2014 update of this report to NRC staff. The document is available through the NRC's website, <http://pbadupws.nrc.gov/docs/ML1430/ML14303A393.pdf>.

After DOE informed the NRC that it would not complete an EIS supplement, the Commission necessarily revised its earlier direction to adopt DOE's supplement. The Commission has directed the staff to plan to develop and issue an EIS supplement, pending a reassessment of available funding in the fall of 2014. The previous cost estimate of \$625,000 for an adoption determination of a DOE-developed EIS supplement will be revised to account for an NRC-developed EIS supplement as part of the fall 2014 reassessment.

The Licensing Support Network (LSN) document collection is fully available to internal users in a nonpublic library of the NRC's Agencywide Documents Access and Management System (ADAMS). This project was completed in April 2014 at a cost of approximately \$286,000. The Commission has also directed that, pending a reassessment of available funding in the fall of 2014, the LSN document collection should be loaded into a publicly accessible library in ADAMS.

The staff's February 2014 estimate that related activities, such as the work performed by NRC attorneys on Federal court litigation following the issuance of the mandamus order, monthly reporting, and other support efforts, will require approximately \$750,000 over the course of the project has not changed.¹

The total cost estimate for the work described above as of October 31, 2014, is projected to be approximately \$10 million.

¹ This total does not include any potential agency liabilities from external litigation.

Nuclear Waste Fund Expenditures

During the month of October, the NRC expended \$600,045 of Nuclear Waste Fund (NWF) funds on its actions in direct response to the court's decision. Cumulative expenditures since the August 13, 2013, U.S. Court of Appeals decision are \$7,958,416. The August 13, 2013, balance of \$13,549,315 of unexpended NWF funding, less the \$7,958,416, results in a remaining unexpended balance of \$5,590,899. Total unobligated NWF funds remaining as of October 31, 2014, are \$4,423,831. The following table provides further details regarding the NRC's expenditure of NWF funds since August 13, 2013.

Yucca Mountain Licensing Activities	Cost Estimate	October Expenditures	Cumulative Expenditures
Completion of the safety evaluation report	\$8,310,000	\$580,305	\$6,914,439
Loading of Licensing Support Network documents into a nonpublic ADAMS library	\$350,000	\$180	\$285,772
Development of the environmental impact statement supplement*	\$625,000	\$0	\$47,427
Program planning and support		\$17,082	\$345,050
Response to the August 30, 2013, Commission Order		\$0	\$137,518
Federal court litigation**		\$2,478	\$153,733
Support/Advice in NRC proceedings		\$0	\$35,535
Subtotal, other support costs chargeable to NWF funds	\$750,000	\$19,560	\$671,836
Adjustments to close out contracts funded by previous NWF appropriations		\$0	\$38,942
Total	\$10,035,000	\$600,045	\$7,958,416

* The estimate of \$625,000 for an adoption determination of a DOE-developed EIS supplement would be revised to account for an NRC-developed EIS supplement as part of the fall 2014 reassessment of remaining NWF funds consistent with Commission direction.

** Includes a \$59,000 expenditure in May for the agency's agreement to settle the Equal Access to Justice Act claim of one of the *Aiken County* petitioners. The agency had sought the views of the Comptroller General as to whether this payment is properly paid with NWF funds. Because the issue related to a pending motion for attorneys' fees filed by the other petitioners in the *Aiken County* litigation, GAO declined to provide the Commission with its views. On October 23, 2014, the Court of Appeals for the District of Columbia Circuit denied the motion for attorneys' fees.

The unexpended NWF fund balance of \$5,590,899 includes \$254,348 of previously appropriated NWF funds that remain unexpended but obligated on contracts with the Center for Nuclear Waste Regulatory Analyses.

The staff has estimated the expenses necessary to complete the SER and related activities directed by the Commission. Figure 1 on page 4 shows the cumulative projected and actual expenditures. Projected expenditures include cost estimates shown in Table 1. The actual cumulative expenditures reflect costs through October 31, 2014, as given in Table 1.

Figure 1. Nuclear Waste Fund Tracking

Stakeholder Communications and Interactions

On October 15, 2014, the NRC issued a media advisory concerning the publication of SER Volume 3 and e-mailed this advisory to the participants in the adjudicatory proceeding and other interested stakeholders. On October 16, the staff issued a press release concerning the publication of SER Volume 3 and e-mailed the document to the participants and other stakeholders.

Status of Safety Evaluation Report (SER) Chapters and Volume Tasks

Volume 2 - Volume 5
