Entergy letter, Flooding Walkdown Report - Entergy's Response to NRC Request for Information Pursuant to 10 CFR 50.54(f) Regarding the Flooding Aspects of Recommendation 2.3 of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident, JAFP-12-0135, dated November 27, 2012
  3. NEI letter, Generic Template for Closure of Flooding Design Basis Walkdown "Restricted Access" Items, APC 13-13, dated May 13, 2013

Dear Sir or Madam:

James A. FitzPatrick Nuclear Power Plant (JAF) submitted the Flooding Walkdown Report on March 27, 2012, [Reference 2] in response to the NRC Request for Information Regarding Recommendations 2.1, 2.3, and 9.3 of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident [Reference 1]. Reference 2 made a commitment to perform inspections of equipment that could not be inspected as identified in section 7.5 of the Flooding Walkdown Report. The Perimeter Drain Pump Pit was classified as restricted access and was scheduled to be inspected by November 1, 2014.

Further evaluation of the Perimeter Drain Pump Pit has determined it to be classified as inaccessible. An evaluation of this equipment as inaccessible is in progress and the resolution of open items in section 7.5 of the Flooding Walkdown Report will be included in a submittal prescribed by Reference 3. This letter changes the commitment in Reference 2 by moving the scheduled completion date for performing the inspections and JAF will submit the resolution of the open items to the NRC by December 30, 2014.

The Regulatory Commitment identified in the Attachment updates existing commitments from Reference 2. Should you have any questions regarding this letter, please contact Chris M. Adner, Regulatory Assurance Manager, at (315) 349-6766.

Sincerely,

Handwritten signature of Chris M. Adner for CMA.
