Trenton, MI 48183

**SUBJECT: REQUEST FOR CONSENT TO DIRECT LICENSE TRANSFER AND RELEASE  
OF DECOMMISSIONED LOCATION OF USE**

Dear Ms. Landry:

By letter dated July 18, 2014, Oakwood Healthcare, Inc. submitted to the U. S. Nuclear Regulatory Commission (NRC) a Request for Consent to Direct License Transfer of NRC Materials License No. 21-16656-01. Based on the information provided, we understand that as a result of an affiliation between Oakwood Healthcare, Inc., Beaumont Health System and Zeiger Health Care Corporation (a.k.a. Botsford Health Care), a new parent corporation, Beaumont Health, Inc. was created. Therefore, the control of Oakwood Hospital – Southshore was directly transferred to Beaumont Health, Inc. through the corporate member Oakwood Healthcare, Inc. We further understand that this transfer will not result in any change to the licensee name, licensed material, persons using the licensed material, location of use of licensed material, or persons responsible for the licensee's radiation safety program.

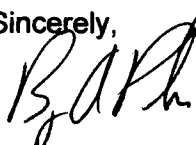

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report which documents the NRC staff's review of the request, we have no objection to the transfer. It is our understanding that the effective date of the transfer was September 1, 2014. With this information, we are issuing an amendment to your NRC license to reflect the transaction (enclosed). Please contact me at 678-828-7050, or by e-mail at [bryan.parker@nrc.gov](mailto:bryan.parker@nrc.gov) if you have any questions regarding this letter.

Also, in your letter dated August 21, 2014, you requested that a location of use be decommissioned and removed from your license. You provided a facility decommissioning report to support your request. The NRC staff has reviewed all of this information, including the final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from 1676 Fort Street, Trenton, Michigan, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Therefore, you may release your facility at 1676 Fort Street, Trenton, Michigan for unrestricted use.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Bryan A. Parker
