Broussard, Louisiana 70518

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 17-27437-01

By letter dated August 21, 2014, Mr. Phillip G. Simpkin informed the U.S. Nuclear Regulatory Commission (NRC) that Baker Hughes Oilfield Operations wished to terminate NRC radioactive materials license 17-27437-01 and combine this license into the existing NRC radioactive materials license 42-02964-01 also issued to Baker Hughes Oilfield Operations. The NRC staff has concluded that all licensable radioactive material and locations of use identified in NRC license number 17-27437-01 can be combined into NRC license number 42-02964-01.

Please find enclosed Amendment No. 13 to License No. 17-27437-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(14)(xi). Please note that NRC license number 42-02964-01 has been amended accordingly under a separate licensing action.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Roberto J. Torres, M.S., Senior Health Physicist
Division of Nuclear Materials Safety
