Washington, DC 20555-0001

Duane Arnold Energy Center  
Docket No. 50-331  
Renewed Op. License No. DPR-49

Response to Reactive Inspection Report

By letter dated February 19, 2015, the NRC transmitted Reactive Inspection Report 50-331/2014011 for the Duane Arnold Energy Center (DAEC). In the inspection report, the NRC identified a finding that has preliminarily been determined to have low to moderate safety significance (White). The letter provided NextEra Energy Duane Arnold, LLC (NextEra) with the opportunity to request a regulatory conference or submit the NextEra position in writing.

NextEra will forgo a Regulatory Conference and instead provide our position on the finding in writing. This request was also verbally communicated to Ms. Christine Lipa.

This letter contains no new regulatory commitments.

If you have any questions or require additional information, please contact Mike Davis, Manager Licensing and Emergency Planning at 319-851-7032.

A handwritten signature in black ink that reads "T. A. Vehec" with a stylized flourish at the end.
