Items of Interest  
Week Ending May 15, 2015**

**Technical Assistance for the Primary Water Stress Corrosion Cracking Testing of Nickel-Based Alloys**

On May 7, 2015, as a result of a non-competitive solicitation, cost-reimbursement Task Order NRC-HQ-60-15-T-0008 was issued under Enterprise-Wide Agreement NRC-HQ-25-14-D-0001 to Pacific Northwest National Laboratory in Richland, Washington. The objective of this task order is to provide assistance to agency staff in performing primary water stress corrosion cracking growth rate testing of alloys 690, 52, and 152. The testing supports the technical bases of safety evaluations for operating reactors and new reactor licensing actions related to pre-service inspections, in-service inspections, and component integrity analyses. The period of performance is from May 8, 2015, through September 30, 2018. The total estimated cost ceiling is \$2,373,520.

**Determine Off-site Response Organization Capabilities and Practices for Protective Actions in the Intermediate Phase of Emergency Response**

On May 6, 2015, as a result of a competitive solicitation, cost-reimbursement Task Order NRC-HQ-60-15-T-0001 was issued under General Services Administration Schedule GS10F048AA to Obsidian Analysis, Incorporated in Washington, DC. The objective of this task order is to conduct an applied research study to advance the agency's understanding of off-site response organization practices and capabilities to support modeling of protective actions in consequence studies and regulatory analyses. The period of performance is from May 6, 2015, through May 5, 2017. The total estimated cost ceiling is \$220,921.

**Issuance of SHINE Medical Technologies, Inc., Draft Supplemental Environmental Impact Statement**

On May 11, 2015, the staff issued the draft environmental impact statement (EIS) for the construction permit application of the SHINE Medical Technologies, Inc. (SHINE) medical radioisotope production facility for public comment. The report contains the NRC's preliminary finding that, after weighing the environmental, economic, technical, and other benefits against environmental and other costs and considering reasonable alternatives, the NRC staff recommends the issuance of the proposed construction permit to SHINE, unless safety issues mandate otherwise. As part of its environmental review of the application, the NRC will hold public meetings on June 10, 2015, near the proposed facility in Janesville, Wisconsin, to discuss the preliminary findings in the draft EIS and to solicit public comments on the document.
