Subject: [External_Sender] Additional media interest in Le Creusot 2.206 petition and request for NRC webcast of PRB

Hello Ms. Banic,

There continues to be media interest in the 2.206 petition re: Le Creusot Forge at-risk components installed in US reactors.

http://www.timesonline.com/news/energy/group-calling-for-shutdown-of-beaver-valley-nuclear-plant/article_bd1aa262-f3ba-11e6-a0af-27769e73726d.htm

We submit to the PRB that this story in regards to First Energy's decision to delay component installation Le Creusot component(s) in Beaver Valley Unit 2 for two years further supports our request for enhanced UT inspection and material testing of installed replacement steam generators and reactor pressure vessel head in Unit 1 manufactured at Le Cresuot Forge during the affected time period. Inspection and l testing of surplus material taken from the Unit 2 component(s) can be conducted without power interruption.

Additionally, the Petitioners would greatly appreciate an answer to our question re: how the 2.206 process determines when a public meeting with the Petition Review Board will provide live stream webcast to provide transparency to the NRC emergency enforcement petition process where there is media interest.

Thank you for your continued attention to this matter,
Paul
