Gentlemen:

Re: St. Lucie Unit 2  
Docket No. 50-389  
Proposed License Amendment  
P-T Limits and LTOP Analysis

By letter L-90-43, dated February 7, 1990, Florida Power & Light Company (FPL) submitted a request to amend the Technical Specifications for St. Lucie Unit 2. The purpose of this amendment is to incorporate revised pressure/temperature (P-T) limits and the results of a revised low temperature overpressure protection (LTOP) analysis into the Technical Specifications for St. Lucie Unit 2. The current St. Lucie Unit 2 Technical Specifications for P-T/LTOP are applicable to 6 effective full power years (EFPY) of operation. Accordingly, the St. Lucie Unit 2 Technical Specifications require revision prior to the plant reaching 6 EFPY.

During its review of this proposed license amendment, the NRC staff identified a typographical error on proposed Figure 3.4-2. Attached is a revised proposed Figure 3.4-2. This typographical error does not affect the Determination of No Significant Hazards Consideration FPL submitted as Attachment 3 to L-90-43 to support this proposed license amendment.

Please contact us if there are any questions about this submittal.

Very truly yours,

D. A. Sager  
Vice President  
St. Lucie Plant
