TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 1245 Appendix C12, "Safety Culture Assessor Training and Qualification Journal," has been revised to replace obsolete iLearn training courses with current ones.

IMC 2514, "AP1000 Reactor Inspection Program - Startup Testing Phase," is an initial issuance that discusses the AP1000 reactor type. Previous versions of IMC 2514 (Light Water Reactor Inspection Program – Startup Testing Phase) focused on BWR and PWR reactor types. IMC 2514 was completely removed from the inspection program on June 6, 2017, because it had been used for the Watts Bar Unit 2 construction phase. Once Watts Bar Unit 2 was in an operating phase, this IMC was no longer needed. It has been completely re-written, and re-issued, for use in the AP1000 reactor program.
