Site: PILGRIM
Emergency Class:

"Pilgrim Nuclear Power Station (PNPS) employees observed a number of whales off the waters of PNPS, about one to two miles northeast. In accordance with PNPS procedural requirements the Whale & Dolphin Conservation (WDC) identified the whales and confirmed a sighting of ten North Atlantic right whales (*Balaena glacialis*). This was reported to National Marine Fisheries Service (NMFS) by members of the WDC.

"Background:

As a result of a mandated environmental review that occurred for PNPS's license extension, the NMFS requested that the NRC require the plant to report any observations of 'listed' (ie., endangered or threatened) whale species to NMFS within 24 hours.

"This report is made in accordance with 10CFR72(b)(2)(xi).

"The NRC Resident Inspector has been notified."

Notified R1DO (Lilliendahl) and Endangered Species Group via email.
