SUBJECT: IDAHO STATE UNIVERSITY – U.S. NUCLEAR REGULATORY COMMISSION  
SECURITY INSPECTION REPORT NO. 50-284/2019-201

Dear Dr. Dunzik-Gougar:

From May 13-15, 2019, the U.S. Nuclear Regulatory Commission (NRC) conducted a security inspection at the Idaho State University AGN-201M Research Reactor facility. The inspection included a review of activities authorized for your facility.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and compliance with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel. Based on the results of this inspection, no significant security concerns or findings of non-compliance with NRC requirements were identified. No response to this letter is required.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.390, "Public inspections, exemptions, requests for withholding," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (Agencywide Documents Access and Management System (ADAMS)). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). However, because of the security-related items contained in the inspection report, and in accordance with 10 CFR 2.390(d), it will not be available for public inspection.

M. Dunzik-Gougar
