Staff Issues Grand Gulf Tornado Missile Risk Evaluator (TMRE) Amendment

On June 18, 2019, the staff issued an amendment to Entergy Operations Inc. authorizing the site-specific implementation of the Tornado Missile Risk Evaluator methodology at Grand Gulf Nuclear Station, Unit 1 (ADAMS Accession No. ML19123A014). This is the last of three pilot reviews that were submitted to support development of a generic NEI methodology that could be used by plants to submit risk-informed amendment requests to address legacy tornado missile non-conformances. The generic NEI methodology was provided in support of the pilots but has not been submitted for NRC approval. Licensees may develop plant-specific submittals subject to the applicable regulatory constraints in each of the pilot approvals.
