Docket No. 50-267

SUBJECT: Additional Information for  
the Reactivity Control  
Technical Specification  
Amendment

REFERENCES: 1) PSC letter, Crawford

between Holmes and  
Heitner, 10/24/89

Dear Mr. Weiss:

Reference (1) submitted to the NRC a proposed amendment to the Fort St. Vrain (FSV) Technical Specifications that will supersede LCOs 4.1.2 through 4.1.6, SRs 5.1.1, 5.1.2, 5.1.3, and 5.1.5, the Interim Technical Specifications, and will incorporate a new Reactivity Control Section. During the NRC review process, it was identified to PSC in Reference (2) that a page numbering discrepancy had appeared in Section 5.1 between the NRC's copy and PSC's copy of the FSV Technical Specifications. While the wording of Section 5.1 is identical in both copies, the words appear on differing pages. Section 5.1 in its entirety is being sent to the NRC to correct this inconsistency between copies. In addition, our previous submittal included one revised page from Section 4.1 which did not have change bar marks in the margin. This deficiency is being corrected by resubmitting the revised Section 4.1 page with the correct bar marks.

The enclosed pages with bar marks, pages 4.1-2 through 4.1-11, 5.1-1 through 5.1-7, 5.1-9, and 5.1-10 of the FSV Technical Specifications, were previously submitted per Reference (1). Additionally, all of the remaining pages of Section 5.1 as they currently appear in PSC's copy of the FSV Technical Specifications are enclosed. These pages are unchanged, and are being sent to provide the complete section to ensure page consistency between PSC's copy and NRC's copy of the FSV Technical Specifications. The page numbering discrepancy resulted from word processing format differences that occurred while incorporating a previous amendment. Hence, the enclosed pages without bar marks do not involve any technical changes, and adopt the Section 5.1 page format as it currently appears in the PSC copy of the Technical Specifications.

If you have any questions or comments regarding the enclosed information, please contact Mr. M. H. Holmes at (303) 480-6960.

Very truly yours,

A. Clegg Crawford  
Vice President
