Donald F. Schnell Senior Vice President Nuclear

U.S. Nuclear Regulatory Commission ATTN: Document Control Desk Mail Station P1-137 Washington, D.C. 20555

Gentlamen:

ULNRC-2101

DOCKET NUMBER 50-483 CALLAWAY PLANT NONCONFORMING MOLDED-CASE <u>CIRCUIT BREAKERS</u> References: 1) NRC Bulletin No. 88-10, dated November 22, 1988 2) ULNRC-1959, dated March 31, 1989 3) NRC Bulletin No. 88-10, Supplement 1, dated

Reference 1 required licensees to identify and trace to the circuit breaker manufacturer (CBM), all molded-case circuit breakers (MCCBs) stored for use in safety-related applications. Union Electric provided the results of this review to the NRC as Reference 2.

August 3, 1989

Based on a preliminary review of responses to Bulletin 88-10, the NFC staff issued Reference 3 which requested licensees to:

- Review written reports submitted to the NRC in accordance with Bulletin 38-10 and verify that the responses meet the bulletin provisions as clarified by the bulletin supplement, and;
- Prepare and retain documentation for possible audit that indicates that the review has been performed as requested.

Union Electric has reviewed the Bulletin 88-10 response (Reference 2) against the clarifications contained in the bulletin supplement. As a result the review of breaker traceability was expanded to include original spares purchased under the construction program which were received after August 1, 1983. The traceability of all safety-related MCCEs stored at

8911160313 891107 PDR ADOCK 05000483

Callaway Plant as of September 1, 1989 was established to a Certificate of Conformance (C of C) to either the CBM or a 10CFR50, Appendix B gualified supplier. Surveillances were performed to establish traceability to the CBM in cases where the C of C was traceable to the qualified supplier.

Therefore, Union Electric has reviewed the bulletin supplement and verified that the bulletin provisions as clarified by the supplement have been met as described in this letter and in Reference 2. Documentation associated with this review is being maintained at Callaway Plant and is available for review by the NRC staff.

If you have any questions concerning this letter, please contact ma.

Very truly yours,

mell

Donald F. Schnell
