Re: License no. R-62
Docket no. 50-124

U. S. Nuclear Regulatory Commission
Mr. Jim Wilson, Project Manager
Standardization and Special Projects Branch
Division of Licensing
Washington D.C. 20555

Dear Jim:

Enclosed is a copy of our complete documentation for license renewal, except for one additional submittal that will be supplied in a couple of months. You will note on pages 3,10 and 18 of Appendix A, Technical Specifications that a few specific parameters are shown as "reserved". These specifications are still being developed by us and we will supply the missing data to the Technical Specification and the amendment to the Safety Analysis Report that will justify those specific parameters.

We had sent you a Safety Analysis Report and Emergency Plan in Spring 1980. You can disregard that submittal since this document incorporates all the information required by the NRC for license renewal as we understand it.

We will not submit any other information except for what I have specified in this letter unless more is requested by the NRC. If you have any questions feel free to contact me at (703)-961-6510.

Sincerely yours,

Alan P. Curtner
Reactor Supervisor

APC/fbl

cc: Dr. T. F. Parkinson, Director
Nuclear Reactor Laboratory

Encl: Nuclear Reactor Facility
Security Plan

Application for a Class 104 License
VPI Nuclear Research Reactor Facility

Note: The enclosed documents are duplicates to ones that were mailed to Mr. James R. Miller and the Document Management Branch on August 25, 1980.
