License Change Application #5
Operating License NPF-82
In Accordance With Generic Letter 89-01
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

- Ref: (1) Generic Letter 89-01, "Implementation of Programmatic Controls for Radiological Effluent Technical Specifications in the Administrative Controls Section of the Technical Specifications and the Relocation of Procedural Details of RETS to the Offsite Dose Calculation Manual or to the Process Control Program," January 31, 1989.
- (2) LILCO letter SNRC-1664 dated January 5, 1990 from William E. Steiger, Jr. to U.S. Nuclear Regulatory Commission; subject: License Change Application, Operating License NPF-82.

Gentlemen:

Attached is License Change Application # 5 requesting amendment of Operating License NPF-82 for the Shoreham Nuclear Power Station (SNPS). This amendment application, conforming to the guidance of Generic Letter 89-01 (reference 1), is made to simplify the full power Technical Specifications (NUREG-1357, April 1989, as amended) that the Long Island Lighting Company (LILCO) presently holds for SNPS. Approval by the Commission's Staff of LILCO's previously submitted license amendment request (reference 2) for the removal of operating authority would make this Generic Letter 89-01 license amendment moot. However, inasmuch as the review and approval schedule for the January 5, 1990 (reference 2) license amendment is indeterminable at this time, it behooves LILCO to take advantage of the immediate relief offered by Generic Letter 89-01. Therefore, this submittal is made for the NRC's review.

Attachment 1 requests modification to the SNPS Technical Specifications to incorporate changes in accordance with the guidance provided by Generic Letter 89-01. LILCO confirms that the guidance of Generic Letter 89-01 has been followed. (Refer to Attachment 1, Table 1.)

Attachment 2 contains the proposed changes to the SNPS Technical Specifications. Attachment 3 and 4 contain the proposed changes to the Offsite Dose Calculation Manual (ODCM) and Process Control Program (PCP) respectively.

LILCO has transmitted a copy of this request to the New York State Energy Office in accordance with 10CFR50.91.

Also attached is one signed copy of a Certificate of Service for License Change Application # 5 to the New York State Energy Office.

Very truly yours,

William E. Steiger, Jr.
Assistant Vice President
Nuclear Operations
