Shoreham Offsite Emergency Plan
Annual Letter of Certification
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Ref: (1) LILCO letter (J.D. Leonard, Jr.) to NRC (Document Control Desk), SNRC-1600, dated June 1, 1989

Gentlemen:

Long Island Lighting Company (LILCO) hereby submits the Annual Letter of Certification of LILCO's Local Offsite Radiological Emergency Response Plan for the Shoreham Nuclear Power Station.

LILCO requests that you transmit the Annual Letter of Certification to FEMA for review by the Regional Assistance Committee in accordance with the NRC-FEMA Memorandum of Understanding.

If you have any questions, please call Mr. Douglas M. Crocker, Nuclear Emergency Preparedness Manager, at (516) 436-4238.

Very truly yours,

W. E. Steiger, Jr.
Assistant Vice President
Nuclear Operations

Annual Letter of Certification
for the Shoreham Nuclear Power Station

Dear Mr. Weberg:

In accordance with Guidance Memorandum PR-1, Section C, Long Island Lighting Company (LILCO) hereby submits its Annual Letter of Certification for the Shoreham Nuclear Power Station. This letter addresses compliance by the Local Emergency Response Organization (LERO) with periodic requirements as prescribed in NUREG-0654/FEMA-REP-1 for the preceding year. As is summarized below, and as is described in more detail in the attachments accompanying this submittal, there is assurance that the requisite activities have been undertaken or completed, as appropriate, by LILCO for the following functions:

- (1) Public Education and Information
- (2) Emergency Facilities and Equipment
- (3) Exercises
- (4) Radiological Emergency Response Training and Drills 1/
- (5) Update of Plans and Letters of Agreement
- (6) Alert and Notification

1/ Under the LERO Plan, emergency preparedness drills of the LERO organization are an integral part of the LERO training program, and therefore these two functions are discussed in conjunction.

See GM PR-1, page 8. LERO's activities in the preceding year with respect to each of these functions are summarized below. In reviewing LERO's emergency preparedness activities for the preceding year, FEMA should recognize that under the Settlement Agreement between itself and New York State, LILCO is contractually bound never to operate Shoreham and to cooperate with the Long Island Power Authority (LIPA) in seeking NRC approval to transfer Shoreham to LIPA. In anticipation of this eventual transfer, LILCO has removed the fuel from the plant's reactor and placed it in the spent fuel pool.

In addition, on December 15, 1989, LILCO submitted to the NRC a request for an exemption from the emergency preparedness requirements of 10 C.F.R. section 50.54 (q), as well as an application to amend Shoreham's operating license to suspend the effect of certain license conditions requiring LILCO to maintain and train LERO (the "LERO submittal"). In its December 15 LERO submittal, LILCO argued that, given the legal prohibition on LILCO's ever operating Shoreham, the plant's defueled condition, and the minimal amount of radioactivity occasioned by the limited period of the plant's low power operation, there is simply no health and safety need to maintain the level of emergency preparedness that currently exists at Shoreham. LILCO argued that it should thus be allowed to cease all offsite emergency preparedness activities at Shoreham, disband LERO, and implement a new "defueled" emergency preparedness (onsite) plan.

To date, the NRC has not acted on LILCO's request that it be permitted to end offsite planning and disband LERO. Until the NRC gives LILCO permission to take such steps, LILCO intends to maintain offsite emergency preparedness at a level that is commensurate with Shoreham's defueled condition, consistent with its operating license, and in conformity with NRC regulations. LILCO believes LERO's activities over the preceding year have met these goals. In some instances, as explained below, certain activities contemplated in the LERO plan and procedures -- but not specifically required by either the NRC regulations or the terms of Shoreham's operating license -- have not been undertaken or completed due to Shoreham's non-operating status and LILCO's pending request to the NRC to cease offsite emergency preparedness.

1. Public Education and Information

The planning standard for this function is stated in NUREG-0654/FEMA-REP-1 II.G as follows: "Information is made available to the public on a periodic basis on how they will be notified and what their initial actions should be in an emergency (e.g., listening to a local broadcast station and remaining indoors), the principal points of contact with the news media for dissemination of information during an emergency (including the physical location or locations) are established in advance, and procedures for coordinated dissemination of information to the public are established."

LILCO has submitted for review the Public Information materials to be disseminated throughout the Plume and Ingestion Exposure Emergency Planning Zones for SNPS. As per LILCO's understanding with the NRC, these approved materials are available for printing, if required. 2/

Additionally, LILCO hosts an annual Media Day, which is an open house to familiarize news media representatives with facilities and procedures that are part of the Emergency Plan. An open house was last held on November 30, 1989. No one from the media attended. The next Media Day open house will be held just prior to the next scheduled NRC/FEMA exercise.

2. Emergency Facilities and Equipment

The planning standard for this function is stated in NUREG-0654/FEMA-REP-1 II.H as follows: "Adequate emergency facilities and equipment to support the emergency response are provided and maintained."

A description of the various equipment and facilities which are available to support the offsite emergency response effort for SNPS is contained in Chapter 4 of the LERO Plan.

The calibration of equipment is done at intervals recommended by the supplier of the equipment. The extensive records documenting the periodic calibration of dosimetry and radiological monitoring equipment are available for inspection in LERO files. Attachment 2 to this submittal is a copy of the most recent inventory records maintained by LILCO for LERO facilities.

3. Exercises

The planning standard for this function is stated in NUREG-0654/FEMA-REP-1 II.N as follows: "Periodic exercises are (will be) conducted to evaluate major portions of emergency response capabilities, periodic drills are (will be) conducted to develop and maintain key skills, and deficiencies identified as a result of exercises or drills are (will be) corrected."

An exercise of the Shoreham Nuclear Power Station Emergency Response Organization (onsite) was conducted on December 6, 1989. The last full participation, FEMA-graded exercise was conducted June 7-9, 1988.

2/LILCO's commitment to the NRC with respect to this matter is contained in SNRC-1586 (April 14, 1989), which is in attachment 1 to this submittal.

Pursuant to 10 C.F.R. Part 50, Appendix E, Paragraph IV.F.3, LILCO is required to conduct an offsite exercise before the end of 1990. As previously noted, on December 15, 1989, LILCO submitted to the NRC a request to cease all offsite emergency preparedness activities. In the cover letter to the LERO submittal, LILCO specifically requested that "pending final action by the NRC" on the LERO submittal, the NRC and LILCO should "agree on interim relief to avoid needless expenditures." Such "interim relief", LILCO noted, should include "postponement of planning for any FEMA-graded exercise . . ." Letter from William E. Steiger, Jr., LILCO Assistant Vice President-Nuclear Operations to Nuclear Regulatory Commission (Dec. 15, 1989) (SNCR-1631) at 3. To date, the NRC has not responded to LILCO's request for interim relief. Pending the disposition of the NRC's consideration of the LERO submittal, at an appropriate time LILCO may seek further, specific relief from the requirement that it conduct a FEMA-graded exercise in 1990.

4. Radiological Emergency Response Training and Drills

The planning standard for the training function is stated in NUREG-0654/FEMA-REP-1 II.0 as follows: "Radiological emergency response training is provided to those who may be called on to assist in an emergency." The planning standard for drills is the same as that for exercises, stated above.

A description of the LERO training and drill program is provided in Chapter 5 of the LERO Plan. Pursuant to the LERO Plan, each new member of LERO is required to attend a specified number of classroom and tabletop training sessions, and each current LERO member is required to take requalification training on an annual basis. Initial and requalification training sessions are held throughout the year. Attachment 3 of this submittal is a summary of the initial and requalification training sessions conducted over the course of the preceding year (January 1 to December 31, 1989). Attachment 3 also includes a summary of the various tabletop sessions and field drills that were held during the previous year.

LILCO offers training to numerous outside support organizations identified in the LERO Plan. Attachment 4 to this submittal identifies those organizations that have participated in training over the course of the preceding year.

LILCO has offered to train the Emergency Broadcast System (EBS) radio station WCBS-AM but it has thus far declined to participate in such training. LILCO will provide training to the station if it wishes. In light of the Settlement

Agreement, and LILCO's pending request to the NRC to discontinue the LERO program, however, it is unlikely that this training will occur. 3/

Finally, LILCO has offered to work with non-participating governments to develop radiological emergency plans. Part of this offer included the provision of training and participation in drills. To date, none of the non-participating governments has accepted LILCO's offer.

5. Update of Plans and Letters of Agreement

The planning standard for this function is stated in NUREG-0654/FEMA-REP-1 II.P.4 as follows: "Each organization shall update its plan and agreements as needed, review and certify it to be current on an annual basis. The update shall take into account changes identified by drills and exercises."

Revision 11 is the annual update of the plan and procedures for 1989. LERO has began the review process for Rev. 12 which should be complete in accordance with the annual review cycle in late May of this year.

LERO continually reviews its letters of agreement and contracts with outside agencies. All letters of agreements and contracts are up-to-date and include the 1990 period.

6. Alert and Notification

The planning standard for this function is stated in NUREG-0654/FEMA-REP-1 II.E as follows: "Procedures have been established for notification, by the licensee of State and local response organizations and for notification of emergency personnel by all response organizations; the content of initial and follow-up messages to response organizations and the public has been established; and means to provide early notification and clear instruction to the populace within the plume exposure pathway Emergency Planning Zone have been established." Three distinct, though interrelated, aspects of the alert and notification function for Shoreham are addressed below.

3/ WCBS-AM in New York City is an FCC-approved EBS station and has been designated as the primary originating relay station for the Nassau-Suffolk Operational Area EBS network. The NRC Atomic Safety and Licensing Board has found that LILCO's reliance on WCBS to service as the primary originating relay station for the Shoreham EBS satisfied NRC requirements, notwithstanding the absence of prior Shoreham-specific training by WCBS. See Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), LBP-88-24, 28 NRC 311, 331 (1988), aff'd, ALAB-911, 29 NRC 247,255, (1989).

a. Prompt Notification Siren System

The Shoreham Prompt Notification Siren System consists of eighty-nine (89) separate sirens, each consisting of a "Fisher-Pierce" receiver and an "Alerting Communicators of America" ("ACA") cabinet, with either a 115db or 125db ACA siren fixed atop a 70-foot class #1 pole.

The siren system is tested in accordance with LILCO Equipment Operation and Maintenance procedure EOM 70028, Rev. 2-29-88. LILCO conducts two siren tests per month. This number includes silent and sounding tests. A sounding test replaces a silent test every three months.

Since June 1, 1989 LILCO conducted three siren sounding tests; June 14, September 13, and December 20, 1989. Attachment 5 summarizes the results of these tests. The sounding average for these three tests is 96%. The overall average of sounding and silent tests for 1989 is 97%. This exceeds the 90% availability required by FEMA.

b. Tone Alert Radio System

LILCO has approximately 200 tone alert radios which are presently tuned to radio station WPLR (99.1 FM in Hamden, Connecticut) and issued to various special facilities within the Shoreham 10-mile EPZ. As WPLR no longer serves in a formal capacity in the Shoreham EBS network, LILCO has had manufactured 250 new Emergency Alert Receivers ("EAR") which are tuned to both WCBS (880 AM in New York City) and WALK (97.5 in Patchogue, New York). These new radios are being maintained in the LERO storage room in Hauppauge, New York, due to Shoreham's non-operating status and the prospect that the radios will not have to be distributed. The radios remain available for immediate delivery along with an instruction book, instruction card and a LILCO label to affix to the radio. This label identifies the tone alert radio assigned number and a 24-hour phone number to call to report a malfunctioning radio.

Should the new EAR tone alert radios be distributed, LILCO will conduct an annual survey of the facilities to determine if the radios are functioning properly. In accordance with OPIP 5.4.1 of the LERO Plan, LILCO updates OPIP 3.4.1 (Listing of Facilities with Tone Activated Radios) when necessary and on an annual basis. Attachment 6 of this submittal is a listing of those facilities that presently have a (WPLR) LILCO-issued tone alert radio.

c. Emergency Response Personnel Pagers

Over 850 pagers have been issued to emergency response personnel in LERO. These pagers are tested every Monday, at which time a test signal is sent from the Control Room at SNPS. No verification by the response personnel of the receipt of the signal is required. Response personnel are instructed to call the LERO office if they do not receive a signal.

In addition, the pagers are used to notify emergency response personnel to report to their pre-assigned locations in conjunction with LERO'S quarterly drill program. In this circumstance, emergency response personnel verify receipt of drill notification by calling into an Automatic Verification System and by reporting to their pre-assigned location.

LILCO appreciates this opportunity to describe the efforts which both LILCO and the Local Emergency Response Organization have taken to ensure that the level of emergency preparedness for Shoreham remains consistent with NRC regulatory requirements and the terms and conditions of LILCO's operating license. LILCO believes that the foregoing submittal demonstrates LILCO's continuing commitment to that goal and that this submittal satisfies the certification requirements for the preceding year as specified in GM PR-1.

Respectfully submitted,

Douglas M. Crocker, Manager
Nuclear Emergency Preparedness
