Re: Docket Nos. 50-329 OM, OL and 50-330 OM, OL
Midland Nuclear Plant - Units 1 and 2
Independent Design and Construction Verification (IDCV) Program
Revision of Engineering Program Plan (EPP) and
Project Quality Assurance Plan (PQAP)

In accordance with Mr. Eisenhut's letter to Mr. Cook dated March 22, 1983, we have modified the EPP to reflect the addition of the Standby Electric Power (SEP) system and the Control Room Heating, Ventilating and Air Conditioning (CRHVAC) system to the scope of the Midland IDCV program. Accordingly, we are pleased to transmit general Revision 2 of the EPP for your review. The revised EPP incorporates comments received from the NRC staff, Consumers Power Company personnel and interested members of the public during a meeting held on April 13, 1983 at the NRC's Bethesda, Maryland offices.

Revision 3 of the PQAP is also transmitted under this cover. This revision updates certain personnel matters, incorporates the protocol for the IDCV program communications documented in Mr. Keppler's letter to Mr. Cook dated March 28, 1983 and incorporates various administrative improvements to the plan.
