U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Gentlemen:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Technical Specification Change Request No. 187  
24 Month Cycle Surveillance Extensions

Pursuant to 10CFR50.90, GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station (OCNGS), Provisional Operating License No. DPR-16, requests a change to Appendix A of that license.

The attached Technical Specification Change Request proposes to revise the Technical Specifications to accommodate implementation of a 21 month operating cycle with a 3 month outage, or a 24 month plant refueling cycle for those Technical Specification surveillances which will expire prior to the currently scheduled 13R refueling outage. The attachment provides justification to support the proposed Technical Specification revisions.

This change request has been reviewed in accordance with Section 6.5 of the OCNGS Technical Specifications, and using the standards in 10 CFR 50.92 we have concluded that these proposed changes do not constitute a significant hazards consideration.

Pursuant to 10CFR50.91(b)(1), a copy of this change request has been sent to the State of New Jersey Department of Environmental Protection.

Very truly yours,

  
E. E. Fitzpatrick  
Vice President and Director  
Oyster Creek
