Attention: Document Control Desk

Gentlemen:

SUBJECT: Grand Gulf Nuclear Station  
Unit 1  
Docket No. 50-416  
License No. NPF-29  
Operational Quality Assurance Manual  
AECM-90/0106

As required by 10CFR50.54(a)(3), the Entergy Operations, Inc. Operational Quality Assurance Manual (OQAM), GGNS-TOP-1A, Revision 9, is being submitted for your evaluation.

To aid you in your review, we have submitted the OQAM in a format to clearly show all changes to the previously accepted version (Revision 8). The material which has been deleted is shown hyphenated-through (*example*); the new material has been shown in light italic (*example*). This format is used in Attachment "B". Attachment C is the identical Manual with the overstruck material deleted and the light italic material incorporated. This format is the actual record copy of our submittal. A revision bar and the number "9" in the right-hand margin identifies each change.

Based on a review and evaluation by the Quality Programs Department, the OQAM continues to satisfy the requirements of 10CFR50, Appendix B and the Regulatory Guides and ANSI Standards referenced in Appendix A of the OQAM.

The program described in OQAM, Revision 9 will be implemented upon NRC approval or 60 days after the date of this submittal.

If you should have any question, please contact the Manager, Quality Services, Stephen F. Tanner (601-437-6711).

Yours truly,
