ULNRC-2220

Gentlemen:

DOCKET NO. 50-483  
CALLAWAY PLANT  
OPERATING QUALITY ASSURANCE MANUAL, REVISION 13

Reference: 1) ULNRC-2014, Dated June 9, 1989

Furnished herewith for your review and approval is a copy of updated pages which constitute Revision 13 of the Callaway Plant Operating Quality Assurance Manual (OQAM). Pursuant to the requirements of 10CFR50.54(a) and 10CFR50.71(e)(3)(i), the OQAM has been revised to incorporate changes to the Operating Quality Assurance Program (OQAP) description made since the last docketed revision transmitted by Reference 1.

In addition to the OQAM, Revision 13 updated pages, please find enclosed one copy each of the following:

1. OQAM (Revision 13) mark-up, identifying changes through the use of inserts and strikeovers.
2. Explanations and justifications for changes to the OQAM.

The changes have been evaluated by Union Electric and, with one exception, are not considered reductions in the OQAM commitments previously accepted by the NRC. The exception (identified as item 9 of Attachment 3) is considered a justified lessening of OQAM commitments which requires NRC approval prior to implementation. The revised OQAM continues to satisfy the requirements of 10CFR50, Appendix B.
