Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: NRC Five-Year Plan

Dear Dr. Murley:

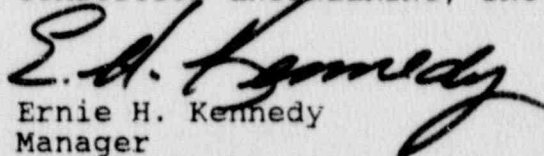

We understand that the Nuclear Regulatory Commission staff is in the process of updating its five-year plan. For planning purposes, the Staff should assume that Combustion Engineering, Inc. will be submitting an application for Final Design Approval and Design Certification of the Process Inherent Ultimate Safety Reactor (PIUS) in fiscal year 1992. Similarly, an application for Final Design Approval and Design Certification of the Safe Integral Reactor (SIR) should be anticipated in fiscal year 1993.

These are, of course, in addition to the application for Design Certification of System 80 Plus™ currently under review by the Staff.

I hope this information will be of use in development of your long-range plan. If you have any questions or require additional information, please call me at (203) 285-4520.

Very truly yours,

COMBUSTION ENGINEERING, INC.

Ernie H. Kennedy
Manager
Nuclear Systems Licensing
