

BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION

In the matter of)
NEW YORK POWER AUTHORITY) Docket No. 50-333
James A. FitzPatrick Nuclear Power Plant)

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

The New York Power Authority requests an amendment to the Technical Specifications contained in Appendix A to Facility Operating License DPR-59 for the James A. FitzPatrick Nuclear Power Plant. This application is filed in accordance with Section 10 CFR 50.90 of the Nuclear Regulatory Commission's regulation.

The Authority committed to prepare and submit Technical Specifications (i.e., LCOs, Surveillance Requirements, and Bases sections) for the remote/alternate shutdown equipment. The new surveillance testing intervals were to be consistent with Regulatory Guide 1.22 guidelines as applied to FitzPatrick. Furthermore, the Authority committed to develop a periodic surveillance test procedure for the remote/alternate shutdown panels in conformance with the requirements of Generic Letter 81-12.

This proposed Technical Specification change fulfills these commitments. The proposed Technical Specification sections, and the associated bases, are based on the improved Standard Technical Specifications, NUREG-1433.

The proposed change to the Technical Specifications is Attachment I to this Application for Amendment to the Operating License. The Safety Evaluation for the proposed change is included as Attachment II.

New York Power Authority

Ralph E. Beedle
