EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 During preparation for plant startup, inboard and outboard 18" drywell
0 3 vent valves failed to close upon hand switch activation. Occurrence
0 4 reportable under Technical Specification 6.7.B.1.i. Valves were opened
0 5 following a reactor scram to deinert the drywell and were maintained
0 6 in an open position for approximately 48 hours prior to attempting to
0 7 close. No previous similar reportable events. No effect on public health
0 8 or safety.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 Two ASCO 3 way Solenoid valves model 8300C64U, failed to vent when coil
1 1 deenergized. Probable cause, solenoids mounted horizontally (which
1 2 decrease opening force and increase friction) and possible residual core
1 3 magnetism. All purge and vent valve solenoids replaced with new
1 4 valves mounted vertical i.a.w. vendor instructions.
