Docket Nos. 50-269, -270, -287  
Inspection Report 50-269, -270, -287/93-23  
Reply to Notice of Violation - Revision

Dear Sir:

By letter dated September 24, 1993 the NRC issued a Notice of Violation as described in Inspection Report No. 50-269/93-23, 50-270/93-23, and 50-287/93-23. Duke Power Company provided a response to the Violation on October 25, 1993.

This letter is to inform you of a change in a commitment completion date. In Example A of the violation, Duke committed to revise the Molded Case Circuit Breaker Test and Inspection Procedure by December 15, 1993.

The Molded Circuit Breaker Testing Program, which is a pilot program, has been suspended for the Unit 3 outage while a thorough review of the entire program is completed. The program review, and any necessary changes as a result thereof, in addition to the procedure revision will be in place before the Unit 1 End of Cycle 15 refueling outage. This is currently scheduled to begin April 15, 1994.

If you have any questions, please contact Susan C. Perry at (803) 885-3300.

Very truly yours,

  
J. W. Hampton
