Preliminary Statement

Pursuant to 10 CFR Part 2 and the Memorandum and Order (Formulating Contentions, Assigning Intervenors, and Setting Schedule) herein, Consolidated Edison Company of New York, Inc. ("Con Edison"), licensee of the Indian Point Station, Unit No. 2, and Power Authority of the State of New York ("Power Authority"), licensee of Indian Point 3 Nuclear Power Plant (collectively the "licensees"), request that the Federal Emergency Management Agency ("FEMA") answer on or before April 26, 1983, under oath and otherwise in accordance with 10 CFR Part 2 and the April 23, 1982 Order, the following supplemental interrogatories. The definitions set forth in full in Licensees Interrogatories to The Federal Emergency Management Agency, dated April 22, 1983 are incorporated herewith as if fully set forth herein.

Supplemental Interrogatories

21. With respect to the 16 operating nuclear power plant sites which have received FEMA approval under the "350" process, describe and identify the training which has been received by persons who would be called upon to provide transportation services to transit-dependent persons in the event of a serious accident at those sites.

22. With respect to the 16 operating nuclear power plant sites which have received FEMA approval under the "350"

process, describe and identify all compensating actions or measures which have been taken during annual exercises at those sites, or which may be taken in the event of a serious accident at those sites, to ameliorate potential or actual lack of cooperation or participation on the part of one or more State, county or local governmental units.

23. Describe and identify the efforts of FEMA to improve the quality of nuclear power plant exercises, to review the methods of critiquing, and to standardize procedures for observing and reporting on exercises, as described in the testimony of Richard W. Krimm before the Subcommittee on Oversight and Investigations of the U.S. House of Representatives dated April 8, 1983.

24. Describe and identify the process by which lack of written agreements with support groups, lack of public education documents, and lack of training for directors or coordinators of response organizations were identified as generic radiological emergency plan deficiencies, and problems associated with evacuation and inadequate scenarios to test State and local resource mobilization capability were identified as generic radiological emergency exercise deficiencies in a September 1982 FEMA report, and describe and identify all FEMA activities to correct for or reduce the impact of such generic deficiencies.

Respectfully submitted,

Brent L. Brandenburg
