SUBJECT: James A. FitzPatrick Nuclear Power Plant  
Docket No. 50-333  
**Proposed Changes to the Technical Specifications and to the  
Operating License to Relocate Technical Specification Requirements  
For Fire Protection to an Administrative Procedure (JPTS-93-020)**

- REFERENCES:
1. NRC Generic Letter 86-10, "Implementation of Fire Protection Requirements," dated April 24, 1986.
  2. NRC Generic Letter 88-12, "Removal of Fire Protection Requirements from the Technical Specifications," dated August 2, 1988.

Dear Sir,

This application for an amendment to the James A. FitzPatrick Operating License (DPR-59) and to the Technical Specifications adds the NRC standard fire protection license condition to the Operating License, and relocates the fire protection requirements from the Technical Specifications to a FitzPatrick administrative procedure.

This change was developed using the guidance contained in NRC Generic Letters 86-10 and 88-12 (References 1 and 2, respectively), and is consistent with NRC and industry efforts to simplify the Technical Specifications. The proposal deviates from the material presently in the FitzPatrick Technical Specifications only where necessary to correct statements that would be incorrect if relocated, or are not applicable in an administrative procedure. No changes have been proposed to the operating, surveillance or administrative requirements except as noted above. The Authority requests that the enclosed proposed Technical Specification changes be approved by October 31, 1994.

The signed original of the Application for Amendment to Operating License is enclosed for filing. Attachments I, II and III to this application contain the proposed changes to the Technical Specifications, proposed changes to the Operating License and the associated safety evaluation, respectively. A mark-up of the affected Technical Specification pages and a mark-up of the affected Operating License pages is included as Attachments IV and V. A draft mark-up of the UFSAR update is provided as Attachment VI, and the changes will be submitted with the 1995 UFSAR Amendment. Attachment VII is a draft mark-up of Administrative Procedure AP-01.04 "Tech Spec Related Requirements, Lists and Tables\*."
