Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
Attn: Document Control Desk
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: General Electric Reactor Trip Breakers

Reference: Letter, E. T. Boulette (MY) to USNRC, MN-90-130
(ETB-90-109) dated December 28, 1990

Dear Dr. Murley:

This letter provides additional information regarding a 10 CFR 21 report made by Maine Yankee concerning General Electric reactor trip breakers (Reference).

Combustion Engineering has supplied other utilities with General Electric reactor trip breakers for use in safety grade equipment similar to that identified by Maine Yankee. These utilities are listed in the Enclosure to this letter. The information provided includes the basic component supplied and its function. This is consistent with the 10 CFR 21 requirement to identify the facility, the activity, or the basic component for such facility or such activity.

If you have any questions on the above, please feel free to contact me or Mr. Mario Robles of my staff at (203) 285-5215.

Very truly yours,

COMBUSTION ENGINEERING, INC.

S. A. Toelle
