ENCLOSURE 1

Questions & Comments on the Course of Action (COA)

1. With regard to the PVQC inspection program, certain elements of your program are still not clear to us. We believe your program of reinspection of accessible work must contain the following:
 - a. A 100% visual inspection of all accessible structures, systems, and components. This inspection should be sufficiently comprehensive to assure that attributes that can be seen visually are in conformance with applicable drawings and specifications, codes and standards, and quality records.
 - b. Physical inspections (nondestructive and destructive) for those cases where the quality records have been questioned.
 - c. Additionally, sampling physical inspections (as proposed in your October 5, 1983 COA) of structures, systems, and components where the quality records have not been questioned.

Please provide clarification of your intentions with respect to the above three items.

Our intent is as you have stated in your comment. The details will be included in the PVQC. See also the discussion of physical inspections in our letter (LOZ-83-0233) to Mr. Keppler dated November 18, 1983 (copy attached).
