Docket No. 50-358

Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

RE: WM. H. ZIMMER NUCLEAR POWER STATION - UNIT 1  
ENVIRONMENTAL QUALIFICATION REPORT, REVISION 2  
W.O. 57300, JOB E-5590, FILE 956C

Attached are six (6) copies of Revision 2 to the Zimmer Environmental Qualification Report for Class 1E Equipment, including the new one (1) volume Environmental Qualification Report for Mechanical Equipment. The two (2) volume electrical report has been substantially revised to reflect ongoing work. The revised electrical report and the new mechanical report also address NRC concerns identified in the Equipment Qualification SER which was transmitted to CG&E from your office by Mr. B.J. Youngblood's July 6, 1983 letter. Action continues on the qualification program which will necessitate further revision to both the electrical and mechanical equipment reports. In accordance with the schedule attached to our August 15, 1983 letter (LOZ-83-0110), additional information will be provided on April 1, 1984 and three (3) months prior to fuel load.

Instructions for inserting the revised electrical report into the original binders are provided at the beginning of Volume 1 of the report. These instructions should be filed with and become a permanent part of the Environmental Qualification Report.
