(D-5 Steam Generator Setpoint Change)

Dear Dr. Murley:

In References (a) through (c), pursuant to 10 CFR 50.90, Commonwealth Edison Company (CECo) proposed to amend Appendix A, Technical Specifications of Facility Operating Licenses NPF-37/66 and NPF-72/77 for Byron/Braidwood Stations. The proposed amendment of Reference (a) and (b) will allow a setpoint change for the Unit 1 Model D-4 Steam Generators level instrumentation, while the proposed amendment of Reference (c) will allow a setpoint change for the Unit 2 Model D-5 Steam Generators level instrumentation at each plant. Each of these amendments will affect only one unit's license, yet affect common pages in each of the separate Technical Specifications books being maintained at NRR. Commonwealth Edison requests that after each amendment is approved that both unit/license specific Technical Specification books for each station be updated with the amended pages. This request is solely administrative in nature. There is therefore no change in the no significant hazards consideration determination of the previous submittals.

Commonwealth Edison is notifying the State of Illinois of this supplement to an application for amendment by transmitting a copy of this letter and its attachment to the designated State Official.

To the best of my knowledge and belief the statements contained herein are true and correct. In some respects, these statements are not based on my personal knowledge but upon information received from other Commonwealth Edison and contractor employees. Such information has been reviewed in accordance with Company practice and I believe it to be reliable.

Please direct any questions you may have concerning this matter to this office.

Respectfully,

Terence K. Schuster
Nuclear Licensing Administrator
