BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2  
DOCKET NOS. 50-325 AND 50-324/LICENSE NOS. DPR-71 AND DPR-62  
NRC INSPECTION REPORT NOS. 50-324/96-04 AND 50-325/96-04  
UNIT 2 MOISTURE SEPARATOR REHEATER MANWAY WELDS

Mr. Ebnetter:

In Inspection Report Nos. 50-324/96-04 and 50-325/96-04, the U.S. Nuclear Regulatory Commission (NRC) documented inspection activities pertaining to the Brunswick Steam Electric Plant, Units 1 and 2. Section 4.1 in this report discussed replacement of the "B" low pressure turbine rotor and included a statement that all welders who performed work on the turbine during this outage were appropriately trained and certified to weld and perform work to the appropriate procedures. Carolina Power & Light Company would like to clarify this statement by noting that all welders who were involved with this work, with the exception of the one non-certified welder discussed in our August 15, 1996 letter, were appropriately trained and certified to weld and perform work to the appropriate procedures.

Please refer any questions regarding this submittal to Mr. Mark A. Turkal at (910) 457-3066.

Sincerely,

William Levis  
Director — Site Operations  
Brunswick Nuclear Plant
