Subject: Limerick Generating Station, Units 1 and 2  
Revised Technical Specification Page for  
Technical Specifications Change Request 96-01-0

Gentlemen:

By letter dated March 29, 1996, PECO Energy submitted Technical Specifications (TS) Change Request 96-01-0 for Limerick Generating Station (LGS), Units 1 and 2, requesting that the TS be revised to eliminate the requirement to perform in-situ functional testing of the Automatic Depressurization System (ADS) valves as part of start-up testing activities.

Subsequently, PECO Energy became aware that information on one of the marked up TS pages was inadvertently deleted. Specifically, the word "OPERABILITY" was deleted from the footnote on the mark-up for TS page 3/4 5-5 for Unit 1. Therefore, the attachment to this letter provides a corrected Unit 1 TS mark-up page for TSCR 96-01-0. The Unit 2 TS mark-up page that was submitted by our letter dated March 29, 1996, contains the correct information.

This information is being submitted under affirmation, and the associated affidavit is enclosed.

If you have any questions or require additional information, please do not hesitate to contact us.

Very truly yours,

G. A. Hunger, Jr.  
Director - Licensing

Enclosure  
Attachment
