

DEC 30 1985

Docket No. 50-346

Toledo Edison Company  
ATTN: Mr. Joe Williams, Jr.  
Vice President, Nuclear  
Edison Plaza - Stop 712  
300 Madison Avenue  
Toledo, Ohio 43652

Gentlemen:

We have received a copy of your application dated October 18, 1985, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application transmitted the steam generator overpressurization analysis for the Davis-Besse Nuclear Power Station, Unit No. 1.

Fees pursuant to 10 CFR 170, as revised June 20, 1984, were not remitted with your application. This revised rule requires licensees to remit an application fee of \$150 with each application for license amendment, relief, exemption and other request. The ONRR staff has informed us that the steam generator overpressurization analysis requires NRC review and approval in order to authorize continued operation at full power conditions. Therefore, it is requested that your Company remit the required application fee of \$150 for your October 18 request. Your Company will be billed for any additional costs for the review of your application in accordance with 10 CFR 170.12(c) and 170.21.

Sincerely,

Signed C. James Holloway, Jr.
